

## h48 2018 Technical Specifications

\*1920 x 1080p at 23.976 frame rate only; the screening Blu-ray disc will be in these settings. Any films that don't follow these guidelines may have artifacts or problems when screening. When in doubt Find Out and *Call Jake* to let him know of any technical issue you may have - If your camera or editing software doesn't allow for these settings let Jake know **ASAP** so we can make a game plan on how to achieve a successful screening.

\*Use h.264 codec with either a .mp4 or .mov container (Don't know what this is - Google Search or call Jake)

\*All films should be under 800MB - ideally they are around 400MB - having any film over 1 gig will have to be compressed again by Jake at a lower bitrate - making your film look more compressed - so just try to make sure the settings aren't too large of a file we don't have to do a new compression. We have to get all the films onto one Blu-ray disc.

\*If you decide to deliver via online: Use WeTransfer only ([www.wetransfer.com](http://www.wetransfer.com)), you will get an email letting you know it has been submitted as well as another email saying it has been downloaded when Jake downloads it, so you will know it was received and you are good to go. IMPORTANT: Dropbox, GoogleDrive or anything else won't be accepted - as it's too easy to lose track of the films.

\*When you name your film file: TeamName\_FilmName\_h482018. This way it is less confusing for everyone. If you have separate versions, you can apply a V1/V2/D1/D2 at the end to specify version or draft number.

\* When submitting in-person use a thumbdrive that is USB.3 formatted for Mac or Fat32 - Jake will be using a MacBook Air to collect all films - If you don't have a thumbdrive that is recognized by Mac then we can't take your film. You can use a USB.2, but they are slow and you slow down the line. Ideally a USB.3

\*Any technical questions call Jake at 208-670-1883; [jakekuwana@yahoo.com](mailto:jakekuwana@yahoo.com)  
(Call or text will be the fastest way to reach Jake)

**The point of everything is to have fun - so don't get too bogged down on the technical parts - if you get confused/don't understand/have a questions/or need any pointers on any technical aspects of the h48 then call Jake - we want to have your film screen the way you created it and to do that we need our tech specs to be on the same page. Even the silliest of questions or something you aren't sure of - Jake wants to help so give him a call or text or email.**
